Oil Analysis

Keeps your machines running longer

OIL ANALYSIS PHONE APP & MACHINE TAGS

Bell LubeCheck requires you to take oil samples and return them to the Bell laboratory.

To improve the process of submitting oil samples, Bell has partnered with WearCheck to provide you the most innovative oil sampling application.

Available for iOS and Android devices, the oil analysis app allows you to easily submit oil samples. Simply scan the machine tag QR-code and the sample bottle QR-code and your sample is submitted.

Enquire about receiving machine QR-code tags for your fleet today.

Install the Machine Tag by **removing the adhesive backing** on the tag and then affix it in a convenient place within the cab:

- Industrial adhesive backing.
- Rugged plastic tag.
- Clearly identifies the machine.
- Clearly identifies the lubricant type.

Download the Oil Analysis app onto your Android or iOS device:

- Works with smart phones & tablets.
- Eliminates the need to complete Sample Information Forms (SIFs)
- Immediately transfers sample information to the laboratory.

Oil Analysis Phone App & Machine Tags

Bell LubeCheck Phone App

Login to the Bell LubeCheck Phone App with your existing WebCheck account and submit your oil samples.

With the Bell LubeCheck phone app, you can:

- Scan sample bottle QR-Codes
- Scan machinery and equipment asset tag QR-Codes
- View and take oil analysis samples from your scheduled sample runs
- View submitted oil analysis sample data during the past 30 days
- Manage sampling schedules
- Modify or delete submitted samples (to correct errors)
- Add new fluid information to your oil analysis sample submissions
