MIXER

WATER SYSTEM

Self-priming volumetric water pump with quick-suction
 Max. capacity: 69 gal/min
 Max. head: 4 bar

One sheet tank on the engine side.
 Max. capacity: 90 gal

Mix control system for programmable and controlled management of water feeding to the drum and of mixing and unloading from the ground panel. Water feeding to the drum controlled by means of electromagnetic flow meter and fed liter reading on both the cabin display and at the rear of the machine. Water pump activation from the driver's seat and from the ground panel. Suction selection from the ground with quick-coupling pipes.

STEERING

Assisted by means of load-sensing power steering with double displacement on 4 steering wheels; steering selection device for: 2 steering wheels, 4 steering wheels - crab steering.

WEIGHTS
